The Atlantic Coast line has purchased the Jacksonville and Southern Railroad, running from Jacksonville to Anderson, ninety miles long. E. S. Spencer and J. W. Cannon, formerly of DeLand, were, respectively, general manager and passenger agent of the J. & S. W. It is announced that there will be no change in the management under the new owners.

Pensacola has based its local assessment of property at 70 per cent of the actual valuation—probably the highest assessed value in the state.

With the assassination of her ministers, Russia's cup of trouble seems to be filling to the brim.

Col. Bob Davis has offered his service to the campaign committee, and will stump the state for Broward. Just as THE NEWS stated six weeks ago.

The rise in the price of meats has little effect in Florida. Florida meat, stall fed, is as good as Chicago meat, and our butchers never strike.

Our Kentucky friends will be interested to learn that over 1,500,000,000 gallons of booze of all kinds were consumed in this country last year. Dividing the aggregate among the entire population, gives every man, woman and child in the country about nineteen gallons apiece. The total cost of this little drink bill is put at something over one billion dollars. Dr. Swallow evidently has his campaign thunder where he can lay his hand on it when he wants it. —Jacksonville Times-Union.

The promoters of the proposed Columbus, Memphis & Pensacola road have succeeded in securing donations of the right of way for a distance of forty miles from Columbus, Miss., and agents are now in the field covering the entire distance over which it is intended to carry the final survey. Chief Engineer Foster and his corps of assistants are busily at work, and the depot locations at the principal points are soon to be determined upon. President Cayce states that there is plenty of capital in sight for the actual construction, and a committee of the board of directors is now inquiring into the feasibility of building south from Columbus through the Tombigbee valley. Preliminary surveys will be made on both sides of the stream. —Pensacola News.

The editor of the St. Augustine Record has discovered a new means of driving away mosquitoes, and a use for a plant heretofore deemed worthless. He says: An article appeared in yesterday's Record relative to the merits of the castor bean as a mosquito fighter. It is said that there is something in the fragrance which the plant emits that is exceedingly distasteful to mosquitoes, and they will not stay in range of the fragrance. The editor recently placed a lot of castor bean leaves around his desk and finds that very few mosquitoes are to be seen when there were hundreds before the leaves were used. Readers may do well to experiment in this line, and if it is found that the castor bean plant will do the work, let them by all means increase the acreage in castor beans.

POLITICAL MATTERS.

Wisconsin has twice voted for tariff reform and once for a Democratic President. I believe that both state and national tickets of the Democratic party will win in Wisconsin this fall.—Thomas E. Bryan, National Committeeman from Wisconsin.

Nebraska will almost surely go Democratic. The Republican governor is unpopular and the national administration in disfavor. The Dietrich scandals are not forgotten. —James C. Dahlman National Committeeman from Nebraska.

Democrats have a splendid chance to carry California. The growing population makes the vote of California a fluctuating one and the way the independent vote swings thus will go the state.—M. F. Tarpey, National Committeeman from California.

The race question is the great issue in Arkansas. It has unified all factions of Democracy there. We want to beat Roosevelt, and believe that the party has a candidate and a platform that will accomplish his defeat.—William H. Martin, National Committeeman from Arkansas.

The candidate and platform are pleasing. We hope to win, with the East with us.—R. M. Johnson, National Committeeman from Texas.

The South and Southwest have had the question thrust upon them as an issue of the coming campaign. Every effort will be made in that section to elect a Democratic president, and I believe that our ticket will win.—R. L. Williams, National Committeeman from Indian Territory.

The Orlando Sentinel-Reporter wants all bedding used by consumptive patients destroyed by order of the State Board of Health. That would be a big job, and there might be a demand for pay for such property.

President Cleveland is the only living ex-president and the only Democrat who has been inducted into the Presidential office since March 4, 1867—a date that will be 48 years old on next inauguration day.—Jacksonville Metropolis.

The family of a dead Japanese soldier gets, roughly speaking, one-third the pay of his rank. This would give the widow of a private \$1.25 a month, a first lieutenant, \$6.25, of a captain, \$8.33, and to the widow of a colonel, \$20.

Mr. H. Haggins, of Melbourne, Fla., writes: "My doctor told me I had consumption and nothing could be done for me. I was given up to die. The Democrats of Florida should make a new record for the party in the coming election. Every man should vote for the ticket, not that it is needed to defeat the feeble opposition, but the idea is to make as good showing as possible so that the state may be entitled to its rightful standing in percentage of Democratic votes. Let everybody vote.—Tampa Herald.
